UNIT 15

Negation, quantity and comparison in discourse

A negative clause can contain more than one negative word without becoming affirmative. Quantity words distinguish an individual from a group, while comparison can express equality, preference or a proportional change. This unit brings these distinctions into connected arguments and requests.

Sections 1–5 give the vocabulary, complete defined systems and constructions needed by the practice. The eight translated examples and the lettered exercises are new teaching material. Cook IX.28–30 and X, XI.31 retain their complete original prompts. The three readings preserve Cook's Old English and original notes; modern helps are identified separately.

Scope and notation. Learn the forms for use in the meanings and constructions stated. A reference table supplies forms for recognition, without requiring their independent recall. Supplied expressions remain available during their exercises and readings. "Unassigned" means that no form or use in that position is required here; it does not assert that a historical form was impossible. In verbal tables, 1, 2 and 3 denote person. Preserve vowel length and the distinction between e and ę.

1. Nouns and their meanings

The tables give nominative, genitive, dative and accusative in both numbers. Unless a number is marked as reference or unassigned, both numbers may be used. Endings that coincide still have distinct grammatical functions: the sentence determines the case. The lexical meaning, gender and stem belong to the whole word.[1]

Strong masculine nouns

The nominative and accusative singular have no ending. The other singular endings are genitive -es and dative -e. The plural endings are nominative/accusative -as, genitive -a and dative -um.

hlāford — masculine; lord; master. Stem **hlāford-**.

Case	Singular	Plural
Nominative	hlāford	hlāfordas
Genitive	hlāfordes	hlāforda
Dative	hlāforde	hlāfordum
Accusative	hlāford	hlāfordas

wīngeard — masculine; vineyard. Stem **wīngeard-**.

Case	Singular	Plural
Nominative	wīngeard	wīngeardas
Genitive	wīngeardes	wīngearda
Dative	wīngearde	wīngeardum
Accusative	wīngeard	wīngeardas

wer — masculine; man. Stem **wer-**.

Case	Singular	Plural
Nominative	wer	weras
Genitive	weres	wera
Dative	were	werum
Accusative	wer	weras

leornungcniht — masculine; disciple. Stem **leornungcniht-**.

Case	Singular	Plural
Nominative	leornungcniht	leornungcnihtas
Genitive	leornungcnihtes	leornungcnihta
Dative	leornungcnihte	leornungcnihtum
Accusative	leornungcniht	leornungcnihtas

lārēow — masculine; master; teacher. Stem **lārēow-**.

Case	Singular	Plural
Nominative	lārēow	lārēowas
Genitive	lārēowes	lārēowa
Dative	lārēowe	lārēowum
Accusative	lārēow	lārēowas

hām — masculine; home; dwelling. Stem **hām-**. This is the noun "home; dwelling", distinct from the directional adverb hām.

Case	Singular	Plural
Nominative	hām	hāmas
Genitive	hāmes	hāma
Dative	hāme	hāmum
Accusative	hām	hāmas

Fōtsceamul retains the vowel of its final element -sceamul- before endings. The long vowel in the first element fōt- does not require the loss of that later vowel.

fōtsceamul — masculine; footstool. Stem **fōtsceamul-**.

Case	Singular	Plural
Nominative	fōtsceamul	fōtsceamulas
Genitive	fōtsceamules	fōtsceamula
Dative	fōtsceamule	fōtsceamulum
Accusative	fōtsceamul	fōtsceamulas

Strong neuter nouns

Heavy stems have no ending in nominative and accusative, singular or plural. Genitive and dative singular take -es and -e; genitive and dative plural take -a and -um. Bebod has a short final stem and takes nominative/accusative plural -u.

hǣr — neuter; hair; a hair. Stem **hǣr-**.

Case	Singular	Plural
Nominative	hǣr	hǣr
Genitive	hǣres	hǣra
Dative	hǣre	hǣrum
Accusative	hǣr	hǣr

lēoð — neuter; poem; poetry; verse. Stem **lēoð-**.

Case	Singular	Plural
Nominative	lēoð	lēoð
Genitive	lēoðes	lēoða
Dative	lēoðe	lēoðum
Accusative	lēoð	lēoð

bebod — neuter; commandment. Stem **bebod-**.

Case	Singular	Plural
Nominative	bebod	bebodu
Genitive	bebodes	beboda
Dative	bebode	bebodum
Accusative	bebod	bebodu

Hēafod loses the unstressed o before an ending: the ending-bearing stem is hēafd-. Its selected nominative/accusative plural is hēafdu. Compare fōtsceamul above: medial vowels are not all deleted by one general rule.

hēafod — neuter; head. Stem **hēafd-**.

Case	Singular	Plural
Nominative	hēafod	hēafdu
Genitive	hēafdes	hēafda
Dative	hēafde	hēafdum
Accusative	hēafod	hēafdu

flǣsc — neuter; flesh. Stem **flǣsc-**. **Plural reference:** the plural forms show the morphology; use the singular for the assigned meaning “flesh”.

Case	Singular	Plural
Nominative	flǣsc	flǣsc
Genitive	flǣsces	flǣsca
Dative	flǣsce	flǣscum
Accusative	flǣsc	flǣsc

Strong feminine nouns

These long-stem nouns have no nominative singular ending. The other singular cases take -e. The plural has nominative/accusative and genitive -a, dative -um. Nouns in -nes double s before an ending. The -ung and -ing nouns use the same selected endings; oblique singular forms in -a are recognized alternatives.

brȳd — feminine; bride. Stem **brȳd-**.

Case	Singular	Plural
Nominative	brȳd	brȳda
Genitive	brȳde	brȳda
Dative	brȳde	brȳdum
Accusative	brȳde	brȳda

hęfignes — feminine; burden. Stem **hęfigness-**.

Case	Singular	Plural
Nominative	hęfignes	hęfignessa
Genitive	hęfignesse	hęfignessa
Dative	hęfignesse	hęfignessum
Accusative	hęfignesse	hęfignessa

āwęndednes — feminine; translation. Stem **āwęndedness-**.

Case	Singular	Plural
Nominative	āwęndednes	āwęndednessa
Genitive	āwęndednesse	āwęndednessa
Dative	āwęndednesse	āwęndednessum
Accusative	āwęndednesse	āwęndednessa

costnung — feminine; temptation. Stem **costnung-**.

Case	Singular	Plural
Nominative	costnung	costnunga
Genitive	costnunge	costnunga
Dative	costnunge	costnungum
Accusative	costnunge	costnunga

bēcrǣding — feminine; reading; reading books. Stem **bēcrǣding-**. **Plural reference:** the meaning practised here is singular “reading”.

Case	Singular	Plural
Nominative	bēcrǣding	bēcrǣdinga
Genitive	bēcrǣdinge	bēcrǣdinga
Dative	bēcrǣdinge	bēcrǣdingum
Accusative	bēcrǣdinge	bēcrǣdinga

Weak masculine nouns

The nominative singular ends in -a. The other singular cases and nominative/accusative plural end in -an; genitive plural takes -ena and dative plural -um. In lēoðwyrhta the final element is the noun head, and the ending follows the whole stem.

gerēfa — masculine; steward; reeve. Stem **gerēf-**.

Case	Singular	Plural
Nominative	gerēfa	gerēfan
Genitive	gerēfan	gerēfena
Dative	gerēfan	gerēfum
Accusative	gerēfan	gerēfan

lēoðwyrhta — masculine; poet. Stem **lēoðwyrht-**.

Case	Singular	Plural
Nominative	lēoðwyrhta	lēoðwyrhtan
Genitive	lēoðwyrhtan	lēoðwyrhtena
Dative	lēoðwyrhtan	lēoðwyrhtum
Accusative	lēoðwyrhtan	lēoðwyrhtan

willa — masculine; will; disposition. Stem **will-**. **Plural reference:** the assigned use is singular "will; disposition".

Case	Singular	Plural
Nominative	willa	willan
Genitive	willan	willena
Dative	willan	willum
Accusative	willan	willan

Root and kinship nouns

Learn the vowel changes with their case positions. Bōc has bēc in genitive and dative singular and nominative and accusative plural. Tōð has tēð in dative singular and nominative and accusative plural. Recognize genitive singular bōce, dative singular tōðe and nominative/accusative plural tōðas as alternatives to the selected forms below.

bōc — feminine; book. Stem **bōc/bēc-**.

Case	Singular	Plural
Nominative	bōc	bēc
Genitive	bēc	bōca
Dative	bēc	bōcum
Accusative	bōc	bēc

tōð — masculine; tooth. Stem **tōð/tēð-**.

Case	Singular	Plural
Nominative	tōð	tēð
Genitive	tōðes	tōða
Dative	tēð	tōðum
Accusative	tōð	tēð

Sweostor is unchanged throughout the singular and in nominative/accusative plural. Only genitive plural sweostra and dative plural sweostrum have different surfaces. Its pattern must be learned separately from the earlier brōðor and mōdor.

sweostor — feminine; sister. Stem **sweostr-**.

Case	Singular	Plural
Nominative	sweostor	sweostor
Genitive	sweostor	sweostra
Dative	sweostor	sweostrum
Accusative	sweostor	sweostor

Abstract nouns in -u

Hætu uses hæte in the selected oblique singular cases. Hælu is unchanged throughout the selected singular. Oblique variants in -u, -o and -e occur, and nominative -o occurs beside -u. Learn the selected singular forms; no plural count meaning is assigned to either word.[2]

hǣtu — feminine; heat. Stem **hǣt-**. **Plural unassigned.**

Case	Singular	Plural
Nominative	hǣtu	Unassigned
Genitive	hǣte	Unassigned
Dative	hǣte	Unassigned
Accusative	hǣte	Unassigned

hǣlu — feminine; salvation. Stem **hǣl-**. **Plural unassigned.**

Case	Singular	Plural
Nominative	hǣlu	Unassigned
Genitive	hǣlu	Unassigned
Dative	hǣlu	Unassigned
Accusative	hǣlu	Unassigned

The complete class model strengu follows. It is **for recognition only in both numbers**. Its spelling is retained from Wright. Besides the selected forms, recognize nominative singular strengo, oblique singular strengu/strengo, and nominative/accusative plural strenge/strengu/strengo. The availability of a class pattern does not supply a count meaning for every abstract noun.

strengu — feminine; strength. Stem **streng-**. **Singular and plural reference only.**

Case	Singular	Plural
Nominative	strengu	strenga
Genitive	strenge	strenga
Dative	strenge	strengum
Accusative	strenge	strenga

People names and an agent noun

Engle and Dęne name peoples in the plural. They take nominative/accusative -e, genitive -a and dative -um. No singular is assigned. Dęniga and Dęnia are recognized genitive plural alternatives.

Engle — masculine; the English (people). Stem **Engl-**. **Singular unassigned.**

Case	Singular	Plural
Nominative	Unassigned	Engle
Genitive	Unassigned	Engla
Dative	Unassigned	Englum
Accusative	Unassigned	Engle

Dęne — masculine; the Danes. Stem **Dęn-**. **Singular unassigned.**

Case	Singular	Plural
Nominative	Unassigned	Dęne
Genitive	Unassigned	Dęna
Dative	Unassigned	Dęnum
Accusative	Unassigned	Dęne

The agent noun ālīesend has singular -es and -e as above. Its selected plural has unchanged nominative/accusative, genitive -ra and dative -um. Nominative/accusative plural forms in -e and -as are recognized alternatives. The plural is morphological reference; the assigned title "Redeemer" is singular.

ālīesend — masculine; Redeemer; one who delivers. Stem **ālīesend-**. **Plural reference.**

Case	Singular	Plural
Nominative	ālīesend	ālīesend
Genitive	ālīesendes	ālīesendra
Dative	ālīesende	ālīesendum
Accusative	ālīesend	ālīesend

Additional senses of familiar nouns

Keep the earlier declensions. These meanings are needed in the following exercises.

mēd — hire; wages paid for work.

tīd — hour.

strǣt — public place; street as a gathering place.

word — speech; utterance.

2. Negation

Finite negation and contractions

Place ne before the finite verb to deny a proposition. Some common verbs have contracted negative forms. The following complete table covers **the present indicative eom/eart/is/sindon and the preterite indicative wæs/wǣre/wǣron only**. It does not replace every form of bēon/wesan. Ne eom, ne eart and ne sindon remain two words; nis and the negative preterites are contracted. Separate ne with the ordinary positive form is also valid.[3]

Negative be-series: indicative

Person and number	Present	Preterite
1 sg.	ne eom	næs
2 sg.	ne eart	nǣre
3 sg.	nis	næs
1–3 pl.	ne sindon	nǣron

nabban — have not.

The complete negative possession series is now available for use. Distinguish first singular næbbe from second and third singular næfst, næfð; the present plural has bb again. A present form denies present possession; a preterite form denies past possession.

Nabban: indicative

Person and number	Present	Preterite
1 sg.	næbbe	næfde
2 sg.	næfst	næfdest
3 sg.	næfð	næfde
1–3 pl.	nabbað	næfdon

willan — be unwilling; refuse (with ne).

Negative willan expresses refusal or unwillingness and governs a plain infinitive. The present and preterite distinguish the time of that unwillingness; English “would not” may need a past refusal, not a future form. These are indicative forms. A supplied subjunctive nolde encountered earlier does not thereby acquire every use of this table.

Negative willan: indicative

Person and number	Present	Preterite
1 sg.	nelle	nolde
2 sg.	nelt	noldest
3 sg.	nele	nolde
1–3 pl.	nellað	noldon

Nān and negative concord

nān — no; no one.

Nān agrees with its noun or stands alone for “no one”. It has the strong long-stem adjective endings in the four cases below. Keep long ā; note masculine accusative singular nānne, feminine plural nāna and neuter nominative/accusative plural nān. Only this strong four-case system is required here.

Nān: strong declension

Case	Masculine singular	Neuter singular	Feminine singular
Nominative	nān	nān	nān
Genitive	nānes	nānes	nānre
Dative	nānum	nānum	nānre
Accusative	nānne	nān	nāne

Case	Masculine plural	Neuter plural	Feminine plural
Nominative	nāne	nān	nāna
Genitive	nānra	nānra	nānra
Dative	nānum	nānum	nānum
Accusative	nāne	nān	nāna

Nān, nāwiht and nǣfre can accompany finite ne or a contracted negative verb. They express **one denial**. This is negative concord: adding a second negative does not turn the clause into an affirmation. Determine what is denied from the roles of the negative expressions, not by counting them.

nāwiht — nothing. Use the selected accusative nāwiht as the thing denied: “nothing”. Other cases are not assigned by this form.

nā — not, negating a contrasted constituent.

Nā can deny one contrasted participant rather than the whole finite assertion. In ic self and nā ōðer, it excludes "another"; the assertion about "I myself" can remain affirmative. Distinguish this constituent use from finite ne. For a negative command, put ne before the imperative; the familiar affirmative command form remains.

3. Indefinite reference, groups and comparison

An unnamed person and each member of a group

ān — a; a certain (introducing an unnamed singular individual). Use the earlier singular strong agreement forms.

Context distinguishes cardinal "one" from indefinite "a certain". Both agree with the same singular noun. An indefinite use does not create a plural cardinal meaning.

hwā — anyone. The earlier personal/neuter case forms are unchanged.

Hwā/hwæt can ask "who?/what?" or refer indefinitely to "anyone/anything" in an appropriate condition or concession. The clause and its setting decide the function. English "any" cannot be replaced mechanically with hwā in every construction. Use the earlier ǣnig when an agreeing "any" is required.

gehwā / gehwæt — each one; everyone / everything.

Gehwā refers to each person; gehwæt to everything. Both are singular, even when they distribute over many members. The genitive can identify the group; the distributive itself takes the case required by its own role. There is one personal column, without separate masculine and feminine forms, and no plural. The selected dative is gehwǣm, and the personal accusative is gehwone.[4]

Gehwā/gehwæt: singular

Case	Neuter singular	Common singular
Nominative	gehwæt	gehwā
Genitive	gehwæs	gehwæs
Dative	gehwǣm	gehwǣm
Accusative	gehwæt	gehwone

man — one; people generally, impersonal subject with singular verb. Only nominative singular man is used in this impersonal function.

Impersonal man means "one; people in general" and takes a third-person singular verb. Do not give it the oblique or plural forms of the ordinary

count noun mann. The count noun still refers to an individual man and retains its earlier declension.

Ælc distributes a singular share to each member; eall can gather the members as a plural whole. An explicit plural subject can retain a plural verb while ælc his pęning distributes one penny to each person. A genitive after a selection word identifies the whole group; it does not determine the selecting word's case.

uncer — of us two, personal genitive after a selection word. Personal genitive uncer means "of us two". Its form is fixed by the partitive relation; it is distinct from the earlier agreeing possessive uncer, "our (two people's)".

Free choice and paired coordination

hwæðer — whichever of two, in swā hwæðer swā.

swā — free-choice framing: swā hwā/hwæt/hwæðer swā; the ... the, proportional relation.

Swā hwā swā means "whoever"; swā hwæt swā means "whatever". Swā hwæðer swā selects "whichever of two". Give the pronoun the case needed within its clause. A pronoun in the main clause can resume the same referent in a different case, such as a subject within the choice clause and a dative recipient in the main clause. A possible or contingent event may take the subjunctive; free choice does not mechanically require one mood. Cook's exceptional attracted dative in 31.12 is supplied with that item.

ægðer — both, in ægðer ge…ge.

Ægðer ge … ge means "both … and". It includes both coordinated constituents. Here ægðer is an invariant coordinator; this expression does not require the separate inflectional family meaning "either".

Equality, preference and proportion

In equality, swā … swā accompanies a positive adjective: "as … as". In a proportional comparison, each swā clause contains a comparative: "the more …, the more …". Each clause retains its own subject, verb and adjective agreement. A proportional relation does not assert equal degree.

swīðe — rather; more, comparing preference; most; very greatly. The positive swīðe "very; greatly" is familiar. Learn comparative swīðor for preference; superlative swīðost is for recognition.

Swīðe: degrees of the adverb

Position	Form
Positive	swīðe
Comparative	swīðor
Superlative	swīðost

Swīðor … ðonne compares preference: “more/rather … than”. The compared expressions retain the cases required by their verb. With lufian, both the preferred object and the alternative are accusative; neither becomes nominative merely by following ðonne.

micel — much; an amount. Use the earlier neuter forms substantivally for an amount.

māre — more, a greater amount. The neuter substantive māre means “more; a greater amount”.

eall — just; exactly, in eall swā. This adverbial use is invariant and distinct from agreeing “all”.

Eall strengthens an equative in eall swā micel swā, “just as much as”. Micel denotes the amount. When the comparison leaves “give” understood, the second recipient remains dative, just as the first recipient does.

Reference limits. Āwiht “anything” and hwæthwega “something” are supplied as exact objects in A10; they are not models for a new case system. The variants ōht and nōht, and the further family citations nǣnig, āhwæðer, nāhwæðer, ǣghwæðer, āhwā, ǣghwā and swā hwilc swā, require no new recall here. The earlier scope of other indefinite families remains unchanged. Instrumental degree expressions are reference material, and the possessive sīn is not introduced.

4. Additional verbs

The following systems supply the forms required by the exercises. Each indicative table is complete for present and preterite, all three persons, singular and plural. Other moods and nonfinite forms are defined separately. A principal part identifies a stem; its citation alone does not require every possible use.[5]

Strong indicative systems

forgieldan — pay; requite; recompense. Strong III; present forgield-, preterite singular forgeald-, preterite plural forguld-, past participle forgolden.

The second- and third-singular present forms forgieltst and forgielt use the selected t cluster. The preterite second singular uses the plural stem plus -e; first and third singular have the bare singular stem. All present plurals end in -að and preterite plurals in -on. The prefix remains attached throughout.

Forgieldan: indicative

Person and number	Present	Preterite
1 sg.	forgielde	forgeald
2 sg.	forgieltst	forgulde
3 sg.	forgielt	forgeald
1–3 pl.	forgieldað	forguldon

tōweorpan — break; overthrow, here break a commandment. Strong III; present tōweorp-, preterite singular tōwearp-, preterite plural tōwurp-, past participle tōworpen.

The second- and third-singular present stem is tōwierp-. The preterite follows the same person/number distribution as forgieldan.

Tōweorpan: indicative

Person and number	Present	Preterite
1 sg.	tōweorpe	tōwearp
2 sg.	tōwierpst	tōwurpe
3 sg.	tōwierpð	tōwearp
1–3 pl.	tōweorpað	tōwurpon

ongietan — understand; perceive. Strong V; present ongiet-, preterite singular ongeat-, preterite plural ongēat-, past participle ongieten.

Second singular ongietst and third singular ongiett retain the selected t-cluster spellings. Third singular ongiet is a recognized alternative. Preterite second singular ongēate takes the plural stem; first and third singular have ongeat. The principal-part infinitive and past participle are reference citations; the complete new system here is indicative.

Ongietan: indicative

Person and number	Present	Preterite
1 sg.	ongiete	ongeat
2 sg.	ongietst	ongēate
3 sg.	ongiett	ongeat
1–3 pl.	ongietað	ongēaton

gehātan — promise. Strong VII. This indicative is a review of the earlier system.

Gehātan keeps its prefix and the familiar hātan stem changes: ā becomes æ in the second- and third-singular present, while the preterite has ē. This review does not add a new prefixed negative or subjunctive system.

Gehātan: indicative review

Person and number	Present	Preterite
1 sg.	gehāte	gehēt
2 sg.	gehǣtst	gehēte
3 sg.	gehǣtt	gehēt
1–3 pl.	gehātað	gehēton

Weak indicative systems

The long-stem weak I verbs below use present -e, -st, -ð, -að and preterite -de, -dest, -de, -don. The repeated plural ending serves all three persons. Dēman also has the complete subjunctive shown separately.

wēnan — suppose; expect; think. Weak I.

Wēnan: indicative

Person and number	Present	Preterite
1 sg.	wēne	wēnde
2 sg.	wēnst	wēndest
3 sg.	wēnð	wēnde
1–3 pl.	wēnað	wēndon

forbærnan — parch; scorch. Weak I.

Forbærnan: indicative

Person and number	Present	Preterite
1 sg.	forbærne	forbærnde
2 sg.	forbærnst	forbærndest
3 sg.	forbærnð	forbærnde
1–3 pl.	forbærnað	forbærndon

lǣran — teach; instruct. Weak I.

Lǣran: indicative

Person and number	Present	Preterite
1 sg.	lǣre	lǣrde
2 sg.	lǣrst	lǣrdest
3 sg.	lǣrð	lǣrde
1–3 pl.	lǣrað	lǣrdon

dēman — judge; condemn. Weak I.

Dēman: indicative

Person and number	Present	Preterite
1 sg.	dēme	dēmde
2 sg.	dēmst	dēmdest
3 sg.	dēmð	dēmde
1–3 pl.	dēmað	dēmdon

The subjunctive singular has one form for all three persons; the plural has -n. Dēme can therefore be indicative first singular or present subjunctive singular; the clause and its function decide. Use the earlier distinctions among assertion, purpose and wish.

Dēman: subjunctive

Person and number	Present	Preterite
1 sg.	dēme	dēmde
2 sg.	dēme	dēmde
3 sg.	dēme	dēmde
1–3 pl.	dēmen	dēmden

hȳrian — hire. Weak II. Keep the long ȳ throughout.

Hȳrian follows lufian: present singular hȳrie, hȳrast, hȳrað, plural hȳriað; the preterite uses hȳrod- and the ordinary weak endings. Distinguish third-singular -að from plural -iað.

Hȳrian: indicative

Person and number	Present	Preterite
1 sg.	hȳrie	hȳrode
2 sg.	hȳrast	hȳrodest
3 sg.	hȳrað	hȳrode
1–3 pl.	hȳriað	hȳrodon

Commands

Each table gives the complete second-person singular/plural command pair. Forgieldan has the strong singular stem without an ending. The weak I singulars ālīes and ætīew also have no ending; their plurals take -að. Weak II cleopa has singular -a and plural cleopiað.

Forgieldan: imperative

Person and number	Imperative
2 sg.	forgield
2 pl.	forgieldað

cleopian — call; summon. Weak II; only the command pair is newly required for use.

Cleopian: imperative

Person and number	Imperative
2 sg.	cleopa
2 pl.	cleopiað

ālīesan — deliver; release. Weak I; only the command pair is newly required for use.

Ālīesan: imperative

Person and number	Imperative
2 sg.	ālīes
2 pl.	ālīesað

ætīewan — show; the earlier verb, now with its complete command pair. Retain short initial æ in ætīew.

Ætīewan: imperative

Person and number	Imperative
2 sg.	ætīew
2 pl.	ætīewað

Infinitives

These are complete pairs of plain and inflected infinitives. Use the plain form after the taught modal verbs. The inflected infinitive follows tō in the uses already learned; particular difficult frames are supplied locally. The pair does not introduce a finite system for the verb.

Forgieldan: infinitives

Position	Form
Plain infinitive	forgieldan
Inflected infinitive	forgieldanne

wyrcean — work; do. The selected pair retains ea before the inflected ending.

Wyrcean: infinitives

Position	Form
Plain infinitive	wyrcean
Inflected infinitive after tō	wyrceanne

onfōn — receive; keep the contracted stem in both infinitives.

Onfōn: infinitives

Position	Form
Infinitive (citation form)	onfōn
Inflected infinitive	onfōnne

forlǣtan — forsake; leave. Keep the long æ in both infinitives.

Forlǣtan: infinitives

Position	Form
Plain infinitive	forlǣtan
Inflected infinitive	forlǣtanne

blōstmian — blossom; bloom. Weak II; only the infinitive pair is required for use here.

Blōstmian: infinitives

Position	Form
Plain infinitive	blōstmian
Inflected infinitive	blōstmianne

Participial bases

Each pair gives the present and past participial base, without adding a complete adjective declension. The present participle can express an accompanying activity in the earlier predicative construction; the past participle can enter the earlier passive. Keep full -ed in lǣred and hæled. Standan is strong VI: its present base standende retains n, and its past base is standen.

Forgieldan: participial bases

Position	Form
Present participle (base form)	forgieldende
Past participle (base form)	forgolden

Lǣran: participial bases

Position	Form
Present participle (base form)	lǣrende
Past participle (base form)	lǣred

hǣlan — save. Weak I; the participial bases are required, not a new finite system.

Hǣlan: participial bases

Position	Form
Present participle (base form)	hǣlende
Past participle (base form)	hǣled

standan — stand. **giefan** — give. Their meanings are familiar; the following complete base pairs supply the forms needed here.

Standan: participial bases

Position	Form
Present participle (base form)	standende
Past participle (citation form)	standen

Giefan: participial bases

Position	Form
Present participle (base form)	giefende
Past participle (citation form)	giefen

Principal parts for reference

For strong verbs the order is infinitive, preterite singular, preterite plural, past participle. Weak verbs have infinitive, preterite singular and past participle. This list is available for reference. Only forms in a separately defined system above, or already learned earlier, require independent use; the remaining citation forms are supplied.

Infinitive	Type	Preterite singular	Preterite plural	Past participle
dēman	weak	dēmde	—	dēmed
forgieldan	strong	forgeald	forguldon	forgolden
hȳrian	weak	hȳrode	—	hȳrod
wēnan	weak	wēnde	—	wēned
tōweorpan	strong	tōwearp	tōwurpon	tōworpen
forbærnan	weak	forbærnde	—	forbærned
lǣran	weak	lǣrde	—	lǣred
ongietan	strong	ongeat	ongēaton	ongieten
gehātan	strong	gehēt	gehēton	gehāten
cleopian	weak	cleopode	—	cleopod
hǣlan	weak	hǣlde	—	hǣled
ālīesan	weak	ālīesde	—	ālīesed
blōstmian	weak	blōstmode	—	blōstmod
ætīewan	weak	ætīewde	—	ætīewed
wyrcean	weak	worhte	—	worht
onfōn	strong	onfēng	onfēngon	onfangen
forlǣtan	strong	forlēt	forlēton	forlǣten
standan	strong	stōd	stōdon	standen
giefan	strong	geaf	gēafon	giefen

5. Adjectives, meanings and government

Complete adjective systems

Each adjective has complete strong and weak tables for the four cases, both numbers and all three genders. Use strong forms in the familiar indefinite and predicative constructions, weak forms after the definite determiner as previously learned. No instrumental system is added.[6]

Riht and gelīc follow the ordinary long-stem pattern: strong feminine nominative singular and neuter nominative/accusative plural have no

ending. The selected strong feminine plural has -a, masculine plural -e. Weak genitive plural has -ra.

riht — right; just.

Riht: strong

Case	Masculine singular	Neuter singular	Feminine singular
Nominative	riht	riht	riht
Genitive	rihtes	rihtes	rihtre
Dative	rihtum	rihtum	rihtre
Accusative	rihtne	riht	rihte

Case	Masculine plural	Neuter plural	Feminine plural
Nominative	rihte	riht	rihta
Genitive	rihtra	rihtra	rihtra
Dative	rihtum	rihtum	rihtum
Accusative	rihte	riht	rihta

Riht: weak

Case	Masculine singular	Neuter singular	Feminine singular
Nominative	rihta	rihte	rihte
Genitive	rihtan	rihtan	rihtan
Dative	rihtan	rihtan	rihtan
Accusative	rihtan	rihte	rihtan

Case	Masculine plural	Neuter plural	Feminine plural
Nominative	rihtan	rihtan	rihtan
Genitive	rihtra	rihtra	rihtra
Dative	rihtum	rihtum	rihtum
Accusative	rihtan	rihtan	rihtan

gelīc — equal; like.

Gelīc: strong

Case	Masculine singular	Neuter singular	Feminine singular
Nominative	gelīc	gelīc	gelīc
Genitive	gelīces	gelīces	gelīcre
Dative	gelīcum	gelīcum	gelīcre
Accusative	gelīcne	gelīc	gelīce

Case	Masculine plural	Neuter plural	Feminine plural
Nominative	gelīce	gelīc	gelīca
Genitive	gelīcra	gelīcra	gelīcra
Dative	gelīcum	gelīcum	gelīcum
Accusative	gelīce	gelīc	gelīca

Gelīc: weak

Case	Masculine singular	Neuter singular	Feminine singular
Nominative	gelīca	gelīce	gelīce
Genitive	gelīcan	gelīcan	gelīcan
Dative	gelīcan	gelīcan	gelīcan
Accusative	gelīcan	gelīce	gelīcan

Case	Masculine plural	Neuter plural	Feminine plural
Nominative	gelīcan	gelīcan	gelīcan
Genitive	gelīcra	gelīcra	gelīcra
Dative	gelīcum	gelīcum	gelīcum
Accusative	gelīcan	gelīcan	gelīcan

mihtig — mighty; powerful.

The selected forms lose i before a vowel-initial ending: mihtges, mihtgum, mihtge, mihtgan. They retain i before a consonantal ending: mihtigne, mihtigre, mihtigra. Strong feminine nominative singular and neuter nominative/accusative plural are mihtig, parallel to the earlier hālig. Unsyncopated forms are recognized variants.

Mihtig: strong

Case	Masculine singular	Neuter singular	Feminine singular
Nominative	mihtig	mihtig	mihtig
Genitive	mihtges	mihtges	mihtigre
Dative	mihtgum	mihtgum	mihtigre
Accusative	mihtigne	mihtig	mihtge

Case	Masculine plural	Neuter plural	Feminine plural
Nominative	mihtge	mihtig	mihtga
Genitive	mihtigra	mihtigra	mihtigra
Dative	mihtgum	mihtgum	mihtgum
Accusative	mihtge	mihtig	mihtga

Mihtig: weak

Case	Masculine singular	Neuter singular	Feminine singular
Nominative	mihtga	mihtge	mihtge
Genitive	mihtgan	mihtgan	mihtgan
Dative	mihtgan	mihtgan	mihtgan
Accusative	mihtgan	mihtge	mihtgan

Case	Masculine plural	Neuter plural	Feminine plural
Nominative	mihtgan	mihtgan	mihtgan
Genitive	mihtigra	mihtigra	mihtigra
Dative	mihtgum	mihtgum	mihtgum
Accusative	mihtgan	mihtgan	mihtgan

mǣre — great; renowned.

Mǣre keeps its final e where there is no added ending and drops it before another ending. Note strong feminine nominative singular and neuter nominative/accusative plural mǣru. Stem-final r with -re/-ra gives mǣrre/mǣrra; weak genitive plural is also mǣrra.

Mǣre: strong

Case	Masculine singular	Neuter singular	Feminine singular
Nominative	mǣre	mǣre	mǣru
Genitive	mǣres	mǣres	mǣrre
Dative	mǣrum	mǣrum	mǣrre
Accusative	mǣrne	mǣre	mǣre

Case	Masculine plural	Neuter plural	Feminine plural
Nominative	mǣre	mǣru	mǣra
Genitive	mǣrra	mǣrra	mǣrra
Dative	mǣrum	mǣrum	mǣrum
Accusative	mǣre	mǣru	mǣra

Mǣre: weak

Case	Masculine singular	Neuter singular	Feminine singular
Nominative	mǣra	mǣre	mǣre
Genitive	mǣran	mǣran	mǣran
Dative	mǣran	mǣran	mǣran
Accusative	mǣran	mǣre	mǣran

Case	Masculine plural	Neuter plural	Feminine plural
Nominative	mǣran	mǣran	mǣran
Genitive	mǣrra	mǣrra	mǣrra
Dative	mǣrum	mǣrum	mǣrum
Accusative	mǣran	mǣran	mǣran

ungeðancfull — unthankful.

Ungeðancfull retains ll in the bare form and before vowel-initial endings, as in ungeðancfulle and ungeðancfullum. Before consonantal endings the selected forms have one l: ungeðancfulne, ungeðancfulre, ungeðancfulra.

Ungeðancfull: strong

Case	Masculine singular	Neuter singular	Feminine singular
Nominative	ungeðancfull	ungeðancfull	ungeðancfull
Genitive	ungeðancfulles	ungeðancfulles	ungeðancfulre
Dative	ungeðancfullum	ungeðancfullum	ungeðancfulre
Accusative	ungeðancfulne	ungeðancfull	ungeðancfulle

Case	Masculine plural	Neuter plural	Feminine plural
Nominative	ungeðancfulle	ungeðancfull	ungeðancfulla
Genitive	ungeðancfulra	ungeðancfulra	ungeðancfulra
Dative	ungeðancfullum	ungeðancfullum	ungeðancfullum
Accusative	ungeðancfulle	ungeðancfull	ungeðancfulla

Ungeðancfull: weak

Case	Masculine singular	Neuter singular	Feminine singular
Nominative	ungeðancfulla	ungeðancfulle	ungeðancfulle
Genitive	ungeðancfullan	ungeðancfullan	ungeðancfullan
Dative	ungeðancfullan	ungeðancfullan	ungeðancfullan
Accusative	ungeðancfullan	ungeðancfulle	ungeðancfullan

Case	Masculine plural	Neuter plural	Feminine plural
Nominative	ungeðancfullan	ungeðancfullan	ungeðancfullan
Genitive	ungeðancfulra	ungeðancfulra	ungeðancfulra
Dative	ungeðancfullum	ungeðancfullum	ungeðancfullum
Accusative	ungeðancfullan	ungeðancfullan	ungeðancfullan

Additional vocabulary

Retain the earlier inflections of the familiar words below. Their stated senses are needed here; the adverbs do not agree with a noun.

īdel — idle; not working.

lǣst — least in rank or importance.

gōd — kind; benevolent.

yfel — evil; evil people.

slēan — kill.

gelīce — likewise; similarly.

eornostlice — accordingly; thus.

ðǣr-tō-ēacan — in addition to that; besides.

dōn — make; render, with agreeing object predicate.

ūt — out.

ymbe — about, of approximate time, with accusative. Use accusative for the approximate time, including an hour.

wið — in exchange or return for, with dative.

for — for; in exchange for, with dative.

ofer — above in rank, with accusative; toward, in gōd ofer persons, with accusative.

ðurh — by, naming an oath standard, with accusative. The spelling ðurh is supplied beside the earlier þurh.

Government and clause relations

Payment and exchange. Forgieldan takes the person paid in the dative and the thing paid in the accusative. Onfōn can take an accusative material payment, including pęning and substantive māre. This payment construction stands alongside the earlier dative use of “receive”. Wið with the dative gives payment or return; for with the dative gives equivalent exchange, as in an eye-for-eye formula. The first noun in that quoted formula is nominative.

Making equal. Dōn takes an accusative object and an agreeing predicate gelīc. The person used as the comparison standard is dative. Distinguish the object’s agreement from the comparison person’s case.

Content after wēnan. Wēnan can introduce a ðæt clause giving the thought or expectation. In a past report, sceolden, the preterite subjunctive plural of sculan, may express an expected outcome, “that they would receive”, rather than a duty.

Kindness and rank. Gōd ofer with the accusative means “kind toward” people. The bare strong accusative plurals ungeðancfulle and yfele can denote “unthankful people” and “evil people” in this use. Ofer with an accusative teacher or master can also mean “above” in rank. Neither use requires physical movement across something.

An oath. Swęrian with ðurh plus accusative names what one swears by. When a negative command is followed by several ne ðurh phrases, each phrase shares that command; the repeated ne does not create several positive assertions.

Teaching and deliverance. Læran takes an accusative person or the accusative matter taught. Ālīes takes the person delivered in the accusative; fram with the dative names what the person is delivered from. The passive teaching expression in Cook 31.3 and the exact substantive dative yfele, “evil”, in 31.4 remain supplied there.

Translated examples — new teaching material

These examples distinguish meanings and constructions; they are not exercises.

1. Nān cyning ne gǣð.

No king goes.

The negative determiner and finite ne express one denial.

2. Se mann ne hæfð męte; se mann næfð męte.

The man does not have food; the man does not have food.

The two clauses have the same negative meaning. The second uses the selected contracted finite form.

3. Hwā hæfð ðæt hūs?

Who has that house?

Hwā asks for the person; this is an ordinary direct question.

4. Gif hwā gā, hē gesiehð ðæt hūs.

If anyone goes, he will see that house.

Hwā is indefinite in the contingent condition. Gā is third-singular present subjunctive here; the following present states the prospective result.

5. Ǣlc mann hæfð sunu.

Each man has a son.

Singular mann and hæfð express distribution to each individual.

6. Se cyning ānum ðissa manna bōc sęlð.

The king gives a book to one of these men.

The selected recipient is dative ānum; the group is genitive ðissa manna. The book is the accusative thing given.

7. Swā se cyning ieldra is, swā hē wīsra is.

The older the king is, the wiser he is.

The paired clauses correlate degrees. Each comparative agrees with the subject of its own clause.

8. Ne sęle ðǣm cyninge ðā bōc.

Do not give the book to the king.

Ne negates a singular command. The king remains the dative recipient and the book the accusative thing.

6. Practice — new teaching material

The form grids identify each requested position even when several answers have the same spelling. Give English explanations for the analysis questions and Old English for composition. In composition, the directions specify the construction being practised. A different grammatical expression may convey the meaning without meeting that particular direction. Keep all supplied help visible.

1. Negative propositions and complete indicative systems

F01

Give the complete present and preterite indicative negative be-series for I, you singular, he, we, you plural and they. Use the selected contracted forms where the table gives them; retain separate ne where it does not. Explain why these are twelve logical positions even where forms coincide.

Response grid: wesan

Person and number	Present	Preterite
1 sg.	(1) ___	(7) ___
2 sg.	(2) ___	(8) ___
3 sg.	(3) ___	(9) ___
1 pl.	(4) ___	(10) ___
2 pl.	(5) ___	(11) ___
3 pl.	(6) ___	(12) ___

Then explain: (13) why twelve positions remain distinct; where ne stays separate.

F02

Give the complete present and preterite indicative of nabban for the six person/number positions. Interpret the first-person singular and third-person plural in each tense as denial of possession.

Response grid: nabban

Person and number	Present	Preterite
1 sg.	(1) ___	(7) ___
2 sg.	(2) ___	(8) ___
3 sg.	(3) ___	(9) ___
1 pl.	(4) ___	(10) ___
2 pl.	(5) ___	(11) ___
3 pl.	(6) ___	(12) ___

Then explain: (13) meaning of present first singular; (14) meaning of present third plural; (15) meaning of preterite first singular; (16) meaning of preterite third plural.

F03

Give the complete present and preterite indicative of the selected negative willan system. Interpret the first-person singular and second-person singular of each tense as refusal to go.

Response grid: willan

Person and number	Present	Preterite
1 sg.	(1) ___	(7) ___
2 sg.	(2) ___	(8) ___
3 sg.	(3) ___	(9) ___
1 pl.	(4) ___	(10) ___
2 pl.	(5) ___	(11) ___
3 pl.	(6) ___	(12) ___

Then explain: (13) meaning of present first singular; (14) meaning of present second singular; (15) meaning of preterite first singular; (16) meaning of preterite second singular.

A01

Interpret the three clauses. Identify every negative word and state the single proposition denied in each; do not turn the accumulated negatives into an affirmation.

(1) Nān mann ne cymð.

(2) Nǣfre ne cōm se cyning.

(3) Nān mann nāwiht ne hæfð.

Responses, in order: (1) clause 1: negative words; (2) clause 1: proposition denied; (3) clause 2: negative words; (4) clause 2: proposition denied; (5) clause 3: negative words; (6) clause 3: proposition denied.

A02

Compare the two clauses. Say whether the verb or one contrasted participant is negated, and identify the contrasting participant.

(1) Ic self gā, and nā ōðer.

(2) Ic ne gā.

Responses, in order: (1) first clause: scope of negation; (2) first clause: contrasting participant; (3) second clause: scope of negation.

C02

Translate: I did not have the book, and I did not wish to go. Use the selected contracted negative preterites of have and will.

C14

Translate: He himself goes, and not another. The referent is a man. Use self and constituent nā.

2. Negative, indefinite and distributive reference

F04

Give all nominative, genitive, dative and accusative forms of nān, singular and plural, in masculine, feminine and neuter. Explain why a form such as nānum needs its noun or sentence to identify the particular case/number/gender.

Response grid: nān

Case	Masculine singular	Neuter singular	Feminine singular
Nominative	(1) ___	(17) ___	(9) ___
Genitive	(2) ___	(18) ___	(10) ___
Dative	(3) ___	(19) ___	(11) ___
Accusative	(4) ___	(20) ___	(12) ___

Case	Masculine plural	Neuter plural	Feminine plural
Nominative	(5) ___	(21) ___	(13) ___
Genitive	(6) ___	(22) ___	(14) ___
Dative	(7) ___	(23) ___	(15) ___
Accusative	(8) ___	(24) ___	(16) ___

Then explain: (25) how the sentence identifies the form's case, number and gender.

F05

Give all nominative, genitive, dative and accusative singular forms of gehwā/gehwæt, distinguishing personal and neuter reference. Explain why no plural column is required for this system.

Response grid: gehwā / gehwæt

Case	Neuter singular	Common singular
Nominative	(5) ___	(1) ___
Genitive	(6) ___	(2) ___
Dative	(7) ___	(3) ___
Accusative	(8) ___	(4) ___

Then explain: (9) reason no plural column is needed.

A03

For each clause identify whether hwā is interrogative, indefinite, or part of a free-choice expression; give the clause meaning and identify its subject.

(1) Hwā cymð?

(2) Gif hwā cume, ic him bōc sęlle.

(3) Swā hwā swā cume, ic him bōc sęlle.

Responses, in order: (1) clause 1: function of hwā; (2) clause 1: meaning; (3) clause 1: subject; (4) clause 2: function of hwā; (5) clause 2: meaning; (6) clause 2: subject; (7) clause 3: function of hwā; (8) clause 3: meaning; (9) clause 3: subject.

A04

Compare the two statements. Explain each versus all, identify the head of each subject, and account for the finite-verb number.

(1) Ælc mann hæfð ānne pęning.

(2) Ealle ðā męnn habbað męte.

Responses, in order: (1) clause 1: quantifier meaning; (2) clause 1: subject head and verb agreement; (3) clause 2: quantifier meaning; (4) clause 2: subject head and verb agreement.

A06

Compare the two uses of man/mann. Identify the subject and finite-verb number, and explain why the impersonal use does not introduce a new plural pronoun.

(1) Man sceal gān.

(2) Se mann gæð.

Responses, in order: (1) clause 1: subject and reference; (2) clause 1: verb number; (3) clause 2: subject and reference; (4) clause 2: verb number; (5) reason this does not supply a new plural pronoun.

A10

Using the supplied meanings, interpret each clause and say whether it asks a question, denies possession, or asserts possession. Explain how nāwiht and ne work together in the middle clause.

Modern help — available throughout this item.

āwiht anything; nāwiht nothing; hwæthwega something. Use these meanings to interpret the three clauses.

(1) Hæfð hē āwiht?

(2) Hē nāwiht ne hæfð.

(3) Hē hæfð hwæthwega.

Responses, in order: (1) clause 1: meaning and statement type; (2) clause 2: meaning and statement type; (3) clause 3: meaning and statement type; (4) how the two negatives work together.

A11

The same words Ān mann cōm occur in two settings: first, a story introduces an unnamed visitor; second, an explicit count contrasts one man with two. Give the sense of ān in each setting, and explain why the nominative agreement is the same.

(1) Ān mann cōm.

(2) Ān mann cōm.

Responses, in order: (1) ān in the first setting; (2) ān in the second setting; (3) reason for the same agreement.

C01

Translate: No man has a book; each has food. Use nān and personal gehwā.

C03

Translate: Has the king any book? He has no book. Use ǣnig in the question and nān with finite negation in the reply.

C04

Translate: If anyone has a book, I shall give him a penny. Use indefinite hwā. Treat the condition as a possibility and use the present subjunctive in the if-clause.

C07

Translate: One can go. Use impersonal man with magan.

C08

Translate: Each son has one book; all the sons have food. Use ǣlc for each and eall for all.

C15

Translate: I give nothing to anyone. Use nāwiht for the thing and nān for the recipient. Use finite ne with the two specified negative expressions.

C16

Translate: No man's son comes. Use nān within the dependent genitive phrase, with finite ne.

C17

Translate: The king has no books. Use contracted negative possession and nān.

C18
Translate: The king sees each person; each person's son is good. Use personal gehwā for both each-person phrases.

C19
Translate: A certain man came, and he had a book. Use indefinite ān to introduce the unnamed man.

3. Free choice, case, parts and groups

A05
Explain the contribution of ǣgðer ge … ge and identify the two coordinated constituents. State whether the statement chooses just one of them.
(1) Ic lufie ǣgðer ge ðone cyning ge his sunu.
Responses, in order: (1) meaning of the construction; (2) first coordinated constituent; (3) second coordinated constituent; (4) whether just one is selected.

A08
In Swā hwā swā cume, ic him bōc sęlle, identify the case required for the subject that comes and the case required for the recipient of the book. Explain how the explicit pronoun in the main clause keeps the two roles separate.
(1) Swā hwā swā cume, ic him bōc sęlle.
Responses, in order: (1) subject of cume and its case; (2) recipient of the book and its case; (3) function of the explicit main-clause pronoun.

A09
Treat ānum uncer as the recipient of a gift and uncer hūs as a subject phrase. Explain the difference between the personal genitive uncer in the first phrase and the agreeing possessive uncer in the second. Identify the role and case of ānum and the number of the group selected by uncer.
(1) ānum uncer
(2) uncer hūs
Responses, in order: (1) first uncer: function; (2) second uncer: function; (3) ānum: role and case; (4) number of the group.

C05
Translate: Whoever goes, I shall give him a penny. Use swā hwā swā and the present subjunctive for the open choice of a possible person.

C06

Translate: Whichever of these two sons comes first, I will give him the book. Use swā hwæðer swā and the present subjunctive for the possible first arrival. Keep the subject of comes nominative and express the recipient again with a dative pronoun in the main clause.

C09

Translate: I see both the king and his son. Use ægðer ge … ge.

4. Equality, preference and proportion

A07

Distinguish the meanings of the three comparisons. Identify the comparison standard or correlated clause in each.

(1) Ðēos bōc is swā gōd swā sēo bōc.

(2) Ic lufie lēoht swīðor ðonne ðīestru.

(3) Swā ðēos bōc māre is, swā hēo bętere is.

Responses, in order: (1) comparison 1: meaning; (2) comparison 1: standard or related clause; (3) comparison 2: meaning; (4) comparison 2: standard or related clause; (5) comparison 3: meaning; (6) comparison 3: standard or related clause.

C10

Translate: The larger that house is, the better it is. Use proportional swā … swā and a pronoun referring back to the house.

C11

Translate: This book is as good as that book, but the king's book is better. Use equal-degree swā … swā in the first clause.

C12

Translate: He loves food more than wine. Use preferential swīðor.

5. Noun systems and commands

F06

Give all nominative, genitive, dative and accusative singular/plural forms of bōc and tōð. Identify the forms that change the stem vowel and distinguish a syncretic surface from a uniquely identifiable case.

Response grid: bōc

Case	Singular	Plural
Nominative	(1) ___	(5) ___
Genitive	(2) ___	(6) ___
Dative	(3) ___	(7) ___
Accusative	(4) ___	(8) ___

Response grid: tōð

Case	Singular	Plural
Nominative	(9) ___	(13) ___
Genitive	(10) ___	(14) ___
Dative	(11) ___	(15) ___
Accusative	(12) ___	(16) ___

Then explain: (17) positions with vowel changes; (18) forms whose cases need context.

F07

Give the complete nominative, genitive, dative and accusative singular/plural of sweostor. Compare the number of distinct surfaces with bōc; explain why the frequent surface sweostor still requires a case analysis in a sentence.

Response grid: sweostor

Case	Singular	Plural
Nominative	(1) ___	(5) ___
Genitive	(2) ___	(6) ___
Dative	(3) ___	(7) ___
Accusative	(4) ___	(8) ___

Then explain: (9) contrast with bōc; (10) reason a sentence still requires case analysis.

F08

Give nominative, genitive, dative and accusative singular of hǣtu and hǣlu. Use the selected forms in the tables. Explain why the plural positions are labelled unassigned and why this neither licenses a count meaning nor claims that no historical plural ever existed.

Response grid: hǣtu

Case	Singular
Nominative	(1) ___
Genitive	(2) ___
Dative	(3) ___
Accusative	(4) ___

Response grid: hǣlu

Case	Singular
Nominative	(5) ___
Genitive	(6) ___
Dative	(7) ___
Accusative	(8) ___

Then explain: (9) selected singular patterns; (10) meaning and limits of the unassigned plural cells.

F09

Give the complete nominative, genitive, dative and accusative singular/plural of gerēfa and lēoðwyrhta. Explain why the word-formation of lēoðwyrhta does not change where its weak-noun ending belongs.

Response grid: gerēfa

Case	Singular	Plural
Nominative	(1) ___	(5) ___
Genitive	(2) ___	(6) ___
Dative	(3) ___	(7) ___
Accusative	(4) ___	(8) ___

Response grid: lēoðwyrhta

Case	Singular	Plural
Nominative	(9) ___	(13) ___
Genitive	(10) ___	(14) ___
Dative	(11) ___	(15) ___
Accusative	(12) ___	(16) ___

Then explain: (17) relation of the compound's structure to its inflection.

A12
Use the complete displayed hēafod and fōtsceamul tables. Identify the ending-bearing stem of hēafod, give its selected nominative/accusative plural, and contrast the stem retained throughout fōtsceamul. Explain why a general instruction to delete every medial vowel would give wrong forms.
(1) hēafod
(2) fōtsceamul
Responses, in order: (1) hēafod: stem before endings; (2) hēafod: nominative/accusative plural; (3) fōtsceamul: stem before endings; (4) why deleting every medial vowel would fail.

C13
Translate: Do not go; give the book to the poor man. Address one person with a negative command followed by an affirmative command.

7. Cook's exercises

The prompts, parentheses, references and translation controls below are Cook's original material. Translate every item into Old English. Modern help is separate and remains available; it supplies unusual forms or constructions without requiring their unaided recall. Numbers in Cook's parentheses refer to his grammar or earlier exercises.[7]

Cook IX.28
Cook IX.28.1
Every one that (87. d) forsakes for my name his house, or his brethren, or sisters (52. 3), or father, or mother, or wife, or children, or lands, with a hundredfold (om. it shall) be requited to him (verb last), and he shall have besides eternal life.
Modern help — available throughout this item.

Keep every alternative, including sisters, and both promised results. Sweostor has its own table; retain the distinct earlier brōðor and mōdor patterns.

Use him mid hundtēontigum forgolden bið, "he will be repaid a hundredfold", with the finite verb last. The initial ǣlc has its own relative clause and is resumed by dative him, the recipient in this supplied passive construction. Mid hundtēontigum means "with a hundredfold". For mīnum naman means "for the sake of my name". Keep this whole construction available as help.

Cook IX.28.2
He gave (sęllan) to each a penny in return for his day's work.

Cook IX.28.3
He sent them into (on, 172) his vineyard.

Cook IX.28.4
He saw others in (om. the) public place standing (169) idle.
Modern help — available throughout this item.

Strǣt here means "public place", with the earlier feminine declension. Cook's reference (169) selects the earlier perception construction: use accusative ōðre with the plain infinitive standan. In 28.7, by contrast, the printed direction explicitly requests a present participle.

Cook IX.28.5
Then said he, Go ye also into my vineyard, and I will give you what (ðæt) is right.

Cook IX.28.6
Once more he went out about (ymbe, 172) the sixth and ninth hour, and did similarly.
Modern help — available throughout this item.

Tīd means "hour". Temporal ymbe takes accusative for the approximate time.

Use supplied nigoðan, the feminine accusative singular weak form of "ninth", with tīd. Siextan, "sixth", is already familiar.

Cook IX.28.7
Then about the eleventh hour he went out, and found others standing (pres. part.).
Modern help — available throughout this item.

Use the supplied expression ðā endleftan tīd, "the eleventh hour", with the feminine accusative singular weak ordinal.

Cook IX.28.8
Then said he, Why stand ye here all day idle?

Cook IX.28.9
Then said they, Because no man (om. hath) hired (hȳrian, 118) us.

Cook IX.28.10
Truly, when even was come [when it was evening become], then said the lord (hlāford) of the vineyard to his steward (gerēfa, 53), Call (cleopian) the workmen, and pay them (164. a) their hire (mēd).
Modern help — available throughout this item.
Æfen means "evening"; wyrhta, "workman"; gerēfa, "steward"; wīngeard, "vineyard"; mēd here, "hire; wages".

Use ðā hit æfen geworden wæs, "when it had become evening". Geworden is the supplied past participle of geweorðan. With cweðan, tō his gerēfan names the person addressed: tō takes dative.
Cook IX.28.11
Accordingly, when those came that came about the eleventh hour (verb last), then received they each his penny.
Modern help — available throughout this item.

Use the supplied expression ðā endleftan tīd, "the eleventh hour", with the feminine accusative singular weak ordinal.
Cook IX.28.12
And those, that there (ðær) first came, supposed that they should (sculan) receive more (māre).

Cook IX.29
Cook IX.29.1
Thou (om. hast) made (dōn) them equal (gelīc) (om. unto) us, which (87. d) (om. have) borne burdens (51. 5) in this day's heat.
Modern help — available throughout this item.

Hęfignessa is accusative plural "burdens"; hǣte is the selected dative singular "heat".

On ðisses dæges hǣte means "in this day's heat": on with dative gives the circumstance; ðisses dæges is a dependent genitive.
Cook IX.29.2
Take that is thine, and go (om. thy way); I will give unto this (om. one) just (eall) as much as (om. unto) thee.

Cook IX.29.3
May I not do what (ðæt) I will?

Cook IX.29.4
Camest thou not to me to work (wyrcean, 200) for (wið) one penny?

Cook IX.29.5
He was (om. a) man (wer) and prophet, mighty in speech and in deed (weorc) before (beforan, 166) God and all (om. the) people (folc).

Cook IX.29.6
That is the judgment, that light (om. is) come into (on, 172) (om. the) world, and men loved darkness (plur.) rather (swīðor) than the light, because their deeds (weorc) were evil.

Cook IX.29.7
God sent not his son into (om. the) world that he (om. should) condemn the world, but that the world (om. may) be saved (hælan, 113) by (ðurh) him.
Modern help — available throughout this item.

Use the supplied spelling ðurh beside the familiar þurh. Here ðurh hine means "through/by way of him". Negation rejects the condemning purpose and contrasts it with saving; it does not deny that the Son was sent.

Cook IX.29.8
Your reward (om. shall) be great, and ye shall be (om. the) children of the Highest; because he is kind (gōd) unto (ofer, 172) (om. the) unthankful and evil.
Modern help — available throughout this item.

Use ðæs Hēahstan, "of the Highest", as a supplied masculine genitive singular divine title. No further superlative forms of hēah are required.

Cook IX.29.9
Give, and (om. it) shall be given you.
Modern help — available throughout this item.

Use the supplied frame ēow bið giefen, "it will be given to you (plural)." Ēow is the dative recipient; no hit is expressed. For one addressee, use ðē bið giefen with a singular command. Keep the frame available while composing; its independent recall is not required.

Cook IX.29.10
The disciple (leornungcniht, 43) is not above (ofer, 172) his master (lārēow).

Cook IX.29.11
Show us thy mercy, and grant us thy salvation.
Modern help — available throughout this item.

Hælu, "salvation", is unchanged through the selected singular. Unnan governs genitive of the thing granted, so use genitive ðīnre with it even though hælu shows no separate genitive ending. Hæle is a recognized oblique alternative.

Cook IX.30

Cook IX.30.1

Swear (thou) not by (ðurh) heaven, because it is God's throne; nor by earth, because it is his footstool (fōtsceamul, 43); nor by Jerusalem (Hierusalem), because it is (om. the) city of (om. the) great (mǣre) king.

Modern help — available throughout this item.

Setl means "seat; throne". Fōtsceamul retains -sceamul- in its inflected stem.

Use the supplied spelling ðurh before each accusative oath standard. Hierusalem is the supplied place name; its other cases are not required.

Cook IX.30.2

Swear not by thy head, because thou canst not make (wyrcean) one hair (hǣr, 47) white or black.

Modern help — available throughout this item.

Hēafod uses hēafd- before endings. Hǣr is neuter and has no nominative/accusative plural ending. Fōtsceamul, by contrast, retains its medial vowel.

Use the supplied spelling ðurh before each accusative oath standard. Hierusalem is the supplied place name; its other cases are not required.

Cook IX.30.3

Be your (plur.) speech thus, It is, It is not.

Cook IX.30.4

Ye (om. have) heard that (om. it) was said, Eye for (for, 166) eye, and tooth (46) for tooth.

Cook IX.30.5

He that breaks (tōweorpan, 104) one of (of, 166) these least commandments (bebod, 47), and teacheth (lǣran) men so (verb last), he (sē) shall be named least in (om. the) kingdom (rīce) of heaven.

Modern help — available throughout this item.

The emphatic resumed sē is a supplied long-vowel nominative masculine singular. In ān of ðissum lǣstum bebodum, "one of these least commandments", of takes dative to identify the group. The same long sē may be used in 30.6.

Cook IX.30.6

He that doeth and teacheth it, he shall be called great (micel).

Modern help — available throughout this item.

The emphatic resumed sē is a supplied long-vowel nominative masculine singular. In ān of ðissum lǣstum bebodum, "one of these least

commandments", of takes dative to identify the group. The same long sē may be used in 30.6.

Cook IX.30.7

Ye (om. have) heard that (om. it) was said in old times (tīd), Kill (thou) not.

Modern help — available throughout this item.

Use the supplied on ealdum tīdum, "in old times", with temporal on and dative plural.

Cook IX.30.8

Is it your (sing.) earth?

Modern help — available throughout this item.

Eorðe, "earth", is feminine. Its possessive must agree with the noun that it modifies.

Cook IX.30.9

He has from his labor what he can.

Modern help — available throughout this item.

Gewinne, "labour", is a supplied noun form in the expression æt his gewinne.

Use æt his gewinne, "from his labour". In the supported ðæt hē mæg, "what he can", an action such as "obtain" is understood. Retain this supplied expression without deriving further forms of gewinn.

Cook IX.30.10

The sun parched his field.

Cook IX.30.11

The roads (weg) should blossom (blōstmian, 118), the roads should bloom, so fair (fæger) (om. a) bride (brȳd, 51. b) shall leave her home (hām).

Modern help — available throughout this item.

Brȳd is feminine; the selected accusative singular is brȳde. Hām is the noun "home", here an accusative object, rather than the directional adverb. Use the given infinitive blōstmian for "blossom".

Cook IX.30.12

If they can, let them live without me.

Modern help — available throughout this item.

Use the supplied permission construction lǣt hīe libban, "let them live": accusative hīe is the understood subject of libban. Gif hīe magon expresses ability. A third-person optative is also a valid way to express the request.

Cook IX.30.13
He never forsakes those that trust in (on) him (172).

Cook X, XI.31

Cook X, XI.31.1
I know truly that my Redeemer liveth.
Modern help — available throughout this item.

Use ālīesend as the singular title "Redeemer". Its displayed plurals remain reference forms.
Cook X, XI.31.2
In my flesh I shall see God, I (om. my)self, and not (nā) (om. an)other.

Cook X, XI.31.3
He was taught (187) to do God's will.
Modern help — available throughout this item.

Use hē wæs lǽred … tō dōnne. The person taught is the passive subject and the understood doer of the infinitive. Godes willan is the infinitive's accusative object, with dependent genitive Godes. This whole passive-and-infinitive frame is supplied.
Cook X, XI.31.4
Lead (thou) us not into temptation, but deliver us from evil.
Modern help — available throughout this item.

Use fram yfele, "from evil". Yfele is a supplied substantive noun in the dative singular, not the ordinary adjective dative yfelum.
Cook X, XI.31.5
Be thy name hallowed.

Cook X, XI.31.6
Thy will befall (geweorðan, verb first) in earth as (swā-swā) in heaven(s).
Modern help — available throughout this item.

Begin with supplied Geweorðe, the third-singular present subjunctive of the prefixed verb. Swā-swā means "just as"; retain this supplied hyphenated expression.
Cook X, XI.31.7
No king of the English was so great as Alfred.
Modern help — available throughout this item.

The names Ælfred, Osburg, Æthelwulf and Asser are supplied; Ælfredes is the genitive for 31.14. Use supplied dative Lǽdene for "Latin", following Cook's glossary Lǽden. The Preface reading below retains its printed Lædene without a length mark.

Cook X, XI.31.8
He fought with the Danes (44. 2); he judged his people; he made translations from Latin; he was poet (lēoðwyrhta).
Modern help — available throughout this item.

Dęne and Engle name peoples in the plural. Lēoðwyrhta is a weak masculine noun, “poet”. Āwęndednes means “translation” and doubles s before endings. The language-name dative is supplied separately.

The names Ælfred, Osburg, Æthelwulf and Asser are supplied; Ælfredes is the genitive for 31.14. Use supplied dative Lǣdene for “Latin”, following Cook’s glossary Lǣden. The Preface reading below retains its printed Lædene without a length mark.

Cook X, XI.31.9
His mother hight Osburg, and his father Æthelwulf.
Modern help — available throughout this item.

The names Ælfred, Osburg, Æthelwulf and Asser are supplied; Ælfredes is the genitive for 31.14. Use supplied dative Lǣdene for “Latin”, following Cook’s glossary Lǣden. The Preface reading below retains its printed Lædene without a length mark.

Supplied hātte means “is/was called”; context supplies past time here. It is a special passive naming form, not the active preterite hēt.

Cook X, XI.31.10
He lived fifty-two years.
Modern help — available throughout this item.

Use the supplied number phrase twā and fīftig gēara, “fifty-two years”. Fīftig means “fifty”; gēara is genitive plural governed by this numeral expression. No further higher numerals are required.

Cook X, XI.31.11
He learned reading after he was twelve (155) years (154. c) old.
Modern help — available throughout this item.

Bēcrǣding means “reading”. Use its singular; the displayed plurals are for reference.

Use æfter ðǣm ðe … wæs for “after he was …”. Here ðe belongs to the supplied after-conjunction and has no separate subject or object role. In twęlf wintra eald, “twelve years old”, wintra is genitive plural with the numeral and adjective of age. Keep both expressions available as help.

Cook X, XI.31.12
His mother had a book of English poems, which she promised (om. to) whichever of her two sons (om. should) first learn it.
Modern help — available throughout this item.

Bōc is accusative singular "book"; bēc belongs to other cases in its table. Lēoða is genitive plural "poems".

Use Engliscra lēoða, "of English poems". The supplied recipient expression is swā hwæðrum hiere twēgra suna swā hīe ǣrest leornode. Hwæðrum is dative because the whole expression is the recipient of the promise; the same person is understood as the learner in the subordinate clause. Leornode is prospective preterite subjunctive, identical in spelling to the indicative; the learning is still to occur. This case attraction is supplied. In the independent free-choice exercises, keep the internal subject nominative and resume it with an explicit dative recipient.
Cook X, XI.31.13
Alfred asked her, Wilt thou in fact give that book to one of us two (uncer), (om. to) him who first understands (ongietan) it?
Modern help — available throughout this item.

The names Ælfred, Osburg, Æthelwulf and Asser are supplied; Ælfredes is the genitive for 31.14. Use supplied dative Lǣdene for "Latin", following Cook's glossary Lǣden. The Preface reading below retains its printed Lædene without a length mark.
Cook X, XI.31.14
Asser, Alfred's bishop, wrote a book of (153) the king's life.
Modern help — available throughout this item.

The names Ælfred, Osburg, Æthelwulf and Asser are supplied; Ælfredes is the genitive for 31.14. Use supplied dative Lǣdene for "Latin", following Cook's glossary Lǣden. The Preface reading below retains its printed Lædene without a length mark.

8. Readings

The Old English passages and the numbered original notes are exact source material, with declared typographic normalization. Modern vocabulary and construction helps precede each passage and remain available for all five tasks on it. Original note numbers are prefixed D, P or R here only to distinguish the three sets. Cook's grammatical references and historical questions are retained as apparatus; answer only the tasks explicitly assigned below.

Attend to each passage's movement: a rebuke becomes a promise, an account of translation becomes a request to readers, and an appeal becomes a series of commands and a concluding wish. Distinguish rhetorical questions, assertions, purposes and petitions.

D. Duties of the rich toward the poor: the opening argument

Cook, First Book, printed p. 159 (PDF p. 175). This is the complete first argument, including its embedded gospel saying. The Savior's outer speech continues on pp. 160–161; its opening quotation mark is intentionally left unmatched in this selection.

Modern vocabulary — supplied for this reading. Forms are glossed in their local senses; the parses identify the forms encountered, not complete new paradigms.

ǣghwilcum — each; every (strong dative masculine singular).

āfierre — remove; take away (present indicative first singular, future reference).

gecweden — said (uninflected ge-prefixed past participle in passive).

dǣd — deed (endingless accusative feminine singular).

drēam — joy; bliss (accusative masculine singular).

fæsthafol — tenacious; withholding, with genitive of what is held (predicate nominative masculine singular).

for — for what reason; why, in for hwȳ/hwon. **for** — for; for the sake of, selected accusative/dative expressions supplied locally.

gedēð — do; perform (present indicative third singular).

geseļlle — give (present indicative first singular, future reference).

geðęncean — remember; bear in mind (plain infinitive after noldest).

giefe — gift (genitive feminine singular dependent on rēcelēasodest).

hundtēontigum — a hundredfold; a hundred in return (dative plural after mid in fixed repayment expression).

hwon — what (reason), instrumental hwon in fixed why expressions (instrumental singular neuter).

of — of; out of a set, selecting one of the least.

on — in worldly life, temporal/situational expression.

rēcelēasodest — neglect; despise (preterite indicative second singular; genitive object).

gesǣd — said (uninflected ge-prefixed past participle, pleonastic with gecweden).

sęlene — bounty; bestowal (dative feminine singular after fram).

simle — always.

Swā-hwæt-swā — whatsoever; whatever (free-choice relative pronoun, accusative neuter object).

tō — to, the person addressed in speech. **tō** — for what purpose; why, in tō hwon.

wlancan — proud; wealthy, here the rich man addressed (substantival weak dative masculine singular).

woruldlīfe — worldly life (dative neuter singular after on).

Modern construction help.

The Savior addresses a rich man. This selection contains the complete opening argument and its embedded gospel quotation. The Savior's speech continues on the next page: the unmatched outer quotation mark is present in this bounded source selection.

For hwȳ and tō hwon ask why. Fæsthafol governs the genitive mīnra gōda, "holding tightly to my goods"; rēcelēasodest takes genitive ðǣre giefe, "neglected the gift." Relative ðe introduces the following clauses; long ðē is the personal pronoun "you/to you."

Āfierre, bist, forgielde and geseļlle have present morphology with future reference in this promised response. Noldest is "you would not/refused"; geðęncean is its infinitive. Wille expresses the present speaker's intention even within a remembered proposition: no mechanical backshift is required.

Ǣghwilcum męnn is the dative recipient; āne gōde dǣd is the accusative object. The subject of gedēð is generic mann, "one/a person." Mid hundtēontigum means "with a hundredfold." The singular him refers back to the person.

Gecweden and gesǣd are two past participles with is; Cook calls the pairing pleonastic. Swā-hwæt-swā means "whatever," the object of sęllað. Ānum of mīnum ðǣm lǣstum means "to one of my least ones"; lǣstum is substantival and dative plural. The repeated gē/sęllað address the quoted audience.

Wið ðæm means "in return for that," with dative singular. Drēam here means joy or bliss, not a dream. Ēcne agrees with accusative masculine drēam.

Cook's text

IX. DUTIES OF THE RICH TOWARD THE POOR.

(From the same Homily as the last.)

> Se Hælend cwæð tō ðǣm wlancan[D1]: "For hwȳ wǣre ðū swā fæsthafol mīnra gōda, ðe ic ðē sealde? Tō hwon[D2] rēcelēasodest ðū ðǣre giefe, ðe ic ðē geaf? Ic ðē nū āfierre[D3] fram mīnre sęlene, ðe ic ðē forgeaf; ðonne bist[D3] ðū wǣdla on woruldlīfe. For hwon[D2] noldest[D4] ðū geðęncean ðæt ic wille[D5] forgieldan ǣghwilcum męnn āne gōde dǣd, ðe for mīnum naman mann gedēð? Mid hundtēontigum ic hit him forgielde,[D3] swā hit is on mīnum godspelle gecweden and gesǣd,[D6] 'Swā-hwæt-swā[D7] gē sęllað ānum of mīnum ðǣm lǣstum,[D8] gē hit simle mē sęllað,[D9] and ic ēow wið[D10] ðǣm gesęlle[D3] ēcne drēam[D11] on heofonum.'

Original notes — Cook.

[D1]: From what OE. word is the Mod. Eng. rich derived (see Skeat, Prin., p. 61)? From what OE. meaning is the modern signification derived?

[D2]: Note Wulfstan's use of tō hwon, for hwon, in the sense of why. See 88.

[D3]: See 188.

[D4]: See 139.

[D5]: Why should not the preterit be used here?

[D6]: Pleonastic.

[D7]: What portion of this is lost, and how is it replaced, in the Mod. Eng. whatsoever?

[D8]: See 66.

[D9]: Cf. the form of this sentence with that on p. 135, l. 14.

[D10]: = in return for. How is this to be reconciled with other senses of wið?

[D11]: Not dream, but joy, bliss.

Tasks D01–D05 — new teaching material. Keep the modern vocabulary, construction helps and original notes available for every task.

D01

State the rich man's fault, the consequence announced, and the promise made to a giver. Identify who speaks and to whom.

Responses, in order: (1) fault; (2) consequence; (3) promise; (4) speaker and addressee.

D02
In the question beginning For hwon noldest ðū, explain the negative verb and the infinitive it governs. Explain why ic wille inside the following content clause can remain present rather than mechanically copying the question's past tense.
Responses, in order: (1) noldest and its infinitive; (2) tense of wille in this context.

D03
In the gospel saying beginning Swā-hwæt-swā, identify what is given, its immediate recipient, the recipient identified by the speaker, and the pronoun that resumes the thing given.
Responses, in order: (1) thing given; (2) immediate recipient; (3) recipient identified by the speaker; (4) resuming pronoun.

D04
Identify the case relations in ānum of mīnum ðǣm lǣstum and wið ðǣm. Use the local helps; explain the difference between choosing a recipient from a group and receiving something in return.
Responses, in order: (1) case relations in the first phrase; (2) case relation and meaning in wið ðǣm.

D05
Translate the complete assigned opening argument, from Se Hǣlend through heofonum. Preserve the change from rebuke to promise and the embedded gospel quotation.

P. Alfred's preface to Boethius

Cook, First Book, printed p. 162 (PDF p. 178). The complete preface.

Modern vocabulary — supplied for this reading. Forms are glossed in their local senses; the parses identify the forms encountered, not complete new paradigms.

Ælfred — Alfred (nominative masculine singular personal name).

ǣmettan — leisure; available time (dative masculine singular after be).

andgiet — meaning; sense (accusative neuter singular object of sętte). **andgiete** — meaning; sense (dative neuter singular after of). **andgietes** — understanding (genitive neuter singular dependent on mǣðe).

andgietfullicost — most intelligibly (superlative adverb).

be — word by word, literal correspondence in word be worde. **be** — according to.

becōmon — come upon; befall (preterite indicative third plural).

bisgodon — occupy; trouble (preterite indicative third plural; syncopated form).

bisga — occupations; cares (nominative feminine plural subject).

Bōclædene — book-Latin; Latin (dative neuter singular after of).

earfoðrīme — hard to count; innumerable (predicate strong nominative feminine plural).

eft — again; afterwards.

Engliscum — English (strong dative neuter singular).

Englisc — English, the language (accusative language name after on, goal of translation).

for — because of, with dative of hindering circumstance. **for** — for; for the sake of, selected accusative/dative expressions supplied locally.

for-ðām-ðe — because (causal conjunction).

gedōn — made; arranged, describing the present form of the translation (past participle).

geleornod — learn; study (past participle in hæfde geleornod).

gereċċan — explain; render (plain infinitive after meahte).

gewęnd — translate; turn from one language into another (past participle).

Lædene — Latin, the language (dative neuter singular language name after of).

lyste — please; be a desire to (present subjunctive third singular impersonal; understood experiencer accusative from ǣlcne).

mæðe — measure; capacity (dative feminine singular after be).

manigfealdum — manifold; many (strong dative feminine plural).

mislicum — various (strong dative feminine plural).

mōde — mind; attention (dative neuter singular).

of — from; corresponding to, sense for sense.

on — during, with dative time.

ongiete — understand; perceive (present subjunctive third singular in condition).

rædan — read (plain infinitive).

rihtlicor — more correctly (comparative adverb).

spelle — account; discourse (dative neuter singular after tō).

swā-swā — just as; like.

sweotolost — most clearly (superlative adverb).

ðæt-ðæt — that which; what (demonstrative accusative neuter + relative accusative neuter).

ðēah — nevertheless; yet (independent adverb).

tō — into; to, result in a new linguistic/literary form.

underfangen — receive; take charge of (past participle in anterior construction hæfde underfangen).

wealhstōd — interpreter; translator (predicate nominative masculine singular).

węnde — translate (preterite indicative third singular).

sind — are (present indicative third plural).

wīte — blame; censure (present subjunctive third singular, governed request coordinated with gebidde).

woruldbisgum — worldly occupations; cares (dative feminine plural after for).

Modern construction help.

Ælfred is subject. The feminine hīe/hēo refers to bōc. The source-language phrases use of plus dative; on Englisc gives the translation's goal. Word be worde contrasts literal verbal correspondence with andgiet of andgiete, sense for sense. Gedōn describes the work's resulting arrangement.

The two superlative adverbs mean "most clearly and most intelligibly". For with dative introduces the worldly cares that constrained how clearly Alfred could explain it. Ǣgðer ge … ge means "both … and"; on mōde/on līchaman identify mind and body. Sind means "are". The relative after Ðā bisga refers to the cares, which are the subject of becōmon.

Hæfde underfangen = "had received/taken charge of." The repeated hæfde governs both geleornod and gewęnd: "had studied ... and translated ...". Ðēah here is "nevertheless"; ðā ... ðā frames "when ... then." Tō Engliscum spelle and tō lēoðe mark resulting literary form. Hīe/hēo still refers to the book.

Supply hē (Alfred) with bitt and hālsað, as Cook's note 4 directs. Ǣlcne ðāra ðe ... means "each of those who ...". Lyste is impersonal: "whom it may please to read this book"; its understood accusative experiencer is the prospective

reader. The requested ðæt clause contains subjunctive gebidde, "that he pray for him."

Ne wīte continues the request: "and not blame him." In gif hē hit rihtlicor ongiete ðonne hē meahte, the first hē is the reader and the second is Alfred (Cook's notes 6–7). Ongiete is subjunctive; wīte is the verb "blame," not the noun "punishment."

Be ... mæðe and be ... æmettan mean according to the measure of one's understanding and one's available leisure. Sceal governs sprecan and dōn. Both ðæt ... and ðæt-ðæt ... function as "what/that which." Preserve the source's hyphenated spelling in the latter.

Cook's text

X. ALFRED'S PREFACE TO BOETHIUS.

(Prefixed to his translation.)

> Ælfred cyning wæs wealhstōd[P1] ðisse bēc, and hīe of Bōclædene[P2] on Englisc węnde, swā hēo nū is gedōn. Hwīlum hē sętte word be worde, hwīlum andgiet of andgiete, swā-swā hē hit ðā sweotolost and andgietfullicost geręccan meahte for ðæm mislicum and manigfealdum woruldbisgum ðe hine oft ægðer ge on mōde ge on līchaman bisgodon. Ðā bisga[P3] ūs sind swīðe earfoðrīme ðe on his dagum on ðā rīcu becōmon ðe hē underfangen hæfde, and ðēah, ðā hē ðās bōc hæfde geleornod, and of Lædene tō Engliscum spelle gewęnd, ðā geworhte hē hīe eft tō lēoðe, swā-swā hēo nū gedōn is. And nū bitt[P4] and for Godes naman hālsað ælcne ðāra ðe ðās bōc rædan lyste,[P5] ðæt hē for hine gebidde, and him ne wīte gif hē[P6] hit rihtlicor ongiete ðonne hē[P7] meahte; for-ðām-ðe ælc mann sceal be his andgietes mæðe, and be his æmettan, sprecan ðæt hē spricð, and dōn ðæt-ðæt hē dēð.

Original notes — Cook.

[P1]: Wealh- signifies foreign (see walnut), and sometimes servant, orig. Celtic, Celt (cf. Wales, Welsh, Cornwall), from Volcæ, the name of a Celtic tribe (Cæsar, Gallic War, Bk. VII.).

[P2]: Perhaps originally in contrast to the Latin spoken in Britain.

[P3]: See 51. a.

[P4]: Supply hē.

[P5]: See 190.

P6: The reader.

P7: Alfred.

Tasks P01–P05 — new teaching material. Keep the modern vocabulary, construction helps and original notes available for every task.

P01

State the two translation methods described, the obstacles Alfred faced, the later change he made to the translation, and his request to readers.

Responses, in order: (1) first translation method; (2) second translation method; (3) obstacles; (4) later change; (5) request to readers.

P02

In the appeal from ðæt hē for hine gebidde through ðonne hē meahte, identify the referent of each of these five tokens in order: hē, hine, him, hē after gif, hē after ðonne. Explain the resulting contrast between the two comparison subjects.

Responses, in order: (1) hē before gebidde; (2) hine after for; (3) him before ne wīte; (4) hē after gif; (5) hē after ðonne; (6) contrast between the comparison subjects.

P03

Explain ægðer ge on mōde ge on līchaman. Then trace the subject and finite verb of the sentence beginning Ðā bisga and identify the two relative clauses that follow.

Responses, in order: (1) meaning and coordination in the first expression; (2) main subject and finite verb; (3) first relative clause; (4) second relative clause.

P04

Explain what is being compared by rihtlicor … ðonne and what the second clause leaves understood. State the function of ne in and him ne wīte and the relationship of that clause to the preceding request.

Responses, in order: (1) comparison and understood words; (2) function of ne and relation of its clause to the request.

P05

Translate Alfred’s complete preface. Preserve the distinction between his account of the translation and his request for a charitable reading.

R. A prayer of King Alfred

Cook, First Book, printed p. 163 (PDF p. 179). The complete prayer.

Modern vocabulary — supplied for this reading. Forms are glossed in their local senses; the parses identify the forms encountered, not complete new paradigms.

ā — ever; always (adverb repeated for intensification).

æghwilcum — each; every (strong dative masculine singular).

ælmihtiga — almighty (weak masculine singular in direct address).

āfierr — remove; take away (imperative second singular).

Amen — Amen (liturgical closing word).

āworhte — do; perform, here deserve by one's conduct (preterite indicative first singular with tō ðē).

clǣnum — pure; clean (strong dative neuter singular). **clǣnum** — pure; clean (strong dative masculine singular).

earnungum — merits; good services (dative feminine plural coordinated under for).

ęnde — end (dative masculine singular after būtan).

for — by; for the sake of, naming grounds of appeal in the prayer.

fūlan — foul (weak accusative feminine singular).

Fultum — help; support (predicate nominative masculine singular, address to God).

gālnesse — lust (accusative feminine singular).

gescield — shield; protect (imperative second singular).

gesewenlicum — visible (strong dative masculine plural).

gestaðela — establish; make steadfast (imperative second singular).

gestranga — strengthen (imperative second singular).

geðance — thought; mind (dative neuter singular after mid).

gewissie — guide; direct (present subjunctive second singular in requested ðæt clause). **gewissa** — guide; direct (imperative second singular).

hālgena — saints; holy ones (substantival genitive plural in -ena).

hīera — their (third-person genitive plural).

inweardlīce — fervently; wholeheartedly.

lof — praise (nominative masculine singular subject).

lufan — love (weak feminine dative singular after for).

mægðhāde — maidenhood; virginity (dative masculine singular after for).

Marian — Mary (genitive form of a foreign name).

Michaeles — Michael (genitive personal name, vernacular -es with Latin Sancti).

mid — with; in the manner of the accompanying quality or mental disposition.

mōd — mind; attention (accusative neuter singular).

Sanctæ — Saint; holy (Latin genitive feminine singular accompanying Marian). **Sancti** — Saint; holy (Latin genitive masculine singular).

Scieppend — Creator (predicate nominative masculine singular title).

tǣc — teach; show (imperative second singular).

ðearfe — benefit; good; need (dative feminine singular after tō, with dependent sāwle).

tō — towards; in relation to the person to whom conduct is directed. **tō** — to; in accordance with, a will as the goal of guidance. **tō** — for; to the benefit of. **tō** — for ever, in fixed tō worulde.

tōforan — before; above all (preposition with dative of comparison or preference).

Tōhopa — hope (predicate nominative masculine singular).

Trēownes — trust; confidence (predicate nominative feminine singular).

ungesewenlicum — invisible (strong dative masculine plural).

Wealdend — Ruler (nominative/vocative masculine singular title).

wiðerwinnum — adversaries (dative masculine plural after wið).

wyrhta — Maker; Creator (not the previously taught workman sense) (nominative singular masculine).

Modern construction help.

Dryhten and God are direct address; ælmihtiga is weak singular. Wyrhta and Wealdend are “Maker and Ruler,” with genitive ealra gesceafta. This Maker sense is distinct from the previously taught workman sense.

The for phrases name grounds of appeal. In ðære hālgan rōde tācne, the genitive phrase “of the holy cross” depends on dative tācne. Sanctæ Marian and Sancti Michaeles are supplied names in genitive function with mixed foreign-name inflection; do not derive a new productive Latin paradigm.

Gehīersumnesse is obedience. Hālgena means saints; lufan is the weak noun's dative; earnungum means merits.

The requested ðæt clause has gewissie, "that you guide." Bęt ðonne ic āworhte tō ðē means better than my conduct towards you has deserved. The following gewissa is a direct singular command. In mīnre sāwle ðearfe, mīnre sāwle is genitive, dependent on dative ðearfe: "for my soul's benefit." Cunne is first-singular subjunctive, "than I myself may know."

Gestaðela, gestranga, āfierr and gescield are addressed singular commands. Establish my mind according to your will; strengthen me against the devil's temptations; remove lust and unrighteousness; protect me against visible and invisible adversaries. The latter adjectives agree with dative plural wiðerwinnum.

Tæc takes dative mē. Its following ðīnne willan is the accusative object of wyrceanne ("to do your will"), as Cook's note 7 specifies. The ðæt clause gives purpose with mæge. Tōforan eallum ðingum means above all things; the two mid phrases give manner: with pure thought and a pure body.

The final causal clause names God as Creator, Redeemer, help, comfort, trust and hope. Sīe is an optative wish, "may there be"; ðē is dative. Ā is repeated three times, followed by tō worulde būtan æghwilcum ęnde, "for ever without any end."

Cook's text

XI. A PRAYER OF KING ALFRED.
(From the end of his translation of Boethius.)

> Dryhten,[R1] ælmihtiga God,[R1] Wyrhta and Wealdend ealra gesceafta, ic bidde ðē for ðīnre miclan mildheortnesse, and for ðære hālgan rōde tācne,[R2] and for Sanctæ Marian mægðhāde, and for Sancti Michaeles gehīersumnesse, and for ealra ðīnra hālgena[R3] lufan and hīera earnungum, ðæt ðū mē gewissie[R4] bęt ðonne ic āworhte tō ðē; and gewissa mē tō ðīnum willan, and tō mīnre sāwle ðearfe,[R5] bęt ðonne ic self cunne[R6]; and gestaðela mīn mōd tō ðīnum willan and tō mīnre sāwle ðearfe; and gestranga mē wið ðæs dēofles[R3] costnungum; and āfierr fram mē ðā fūlan gālnesse and ælce unrihtwīsnesse; and gescield mē wið mīnum wiðerwinnum, gesewenlicum and ungesewenlicum; and tæc mē ðīnne willan[R7] tō wyrceanne; ðæt ic mæge[R8] ðē inweardlīce lufian tōforan eallum ðingum, mid clænum geðance and mid clænum līchaman.
> For-ðon-ðe ðū eart mīn Scieppend,[R9] and mīn Ālīesend, mīn Fultum, mīn Frōfor, mīn Trēownes, and mīn Tōhopa. Sīe ðē lof and wuldor nū and ā ā ā, tō worulde būtan æghwilcum ęnde. Amen.

Tasks R01–R05 — new teaching material. Keep the modern vocabulary, construction helps and original notes available for every task.

R01

Identify the opening requested action after ic bidde and each of the six subsequent direct commands. For each give the actual finite form, its mood and its essential meaning.

Requested action	Finite form	Mood	Meaning
Opening requested action	(1) ___	(2) ___	(3) ___
First direct command	(4) ___	(5) ___	(6) ___
Second direct command	(7) ___	(8) ___	(9) ___
Third direct command	(10) ___	(11) ___	(12) ___
Fourth direct command	(13) ___	(14) ___	(15) ___
Fifth direct command	(16) ___	(17) ___	(18) ___
Sixth direct command	(19) ___	(20) ___	(21) ___

R02

Explain the grounds of entreaty introduced by the repeated for phrases. In for ðære hālgan rōde tācne, distinguish the noun governed by for from its dependent genitive.

Responses, in order: (1) meaning of the for phrases; (2) case relations in ðære hālgan rōde tācne.

R03

Compare the two bęt ðonne clauses. State the standard in each and explain why the second one uses cunne in this petition.

Responses, in order: (1) first comparison standard; (2) second comparison standard; (3) explanation of cunne.

R04

Distinguish the purpose clause ðæt ic mæge … lufian from the concluding Sīe ðē lof and wuldor. Identify the actor/addressee, the mood and the function of each.

Responses, in order: (1) first clause: actor/addressee; (2) first clause: mood; (3) first clause: function; (4) second clause: actor/addressee; (5) second clause: mood; (6) second clause: function.

R05

Translate the complete prayer, including the grounds of entreaty, the commands, the purpose and the concluding praise.

9. Sources and selected forms

[1]: Cook, A First Book in Old English, 2nd ed., pp. 28–37, especially §§43–53. Tables give selected complete models; stated alternatives remain valid.

[2]: Wright, Old English Grammar, p. 184, §§382–383, supplies the complete strengu class and its variants. Bosworth–Toller, p. 500b, treats hǣlu as indeclinable. These facts support the selected singular tables without assigning plural count uses.

[3]: Cook, First Book, pp. 23, 74, 78–79 and 100. The selected negative indicative forms combine the positive systems with the stated contractions; the multiword entries remain ordinary ne plus a verb.

[4]: Cook, First Book, pp. 52–53; Wright, Old English Grammar, pp. 239–240. Further indefinite and free-choice families are acknowledged only within the limits stated above.

[5]: Cook, First Book, pp. 54–74 and the cited lexical entries. The class patterns determine endings and stem distribution; each newly required system is printed in full above.

[6]: Cook, First Book, pp. 39–41, §§57–59. The selected -ig syncopation and double-consonant spellings do not exclude the stated historical alternatives.

[7]: Cook, Exercises in Old English (1895), IX.28–30 and X, XI.31, printed pp. 15–18 (PDF pp. 23–26). The preserved source prompts are distinct from the modern directions and helps.
